The best EQUIPE ever
Our EQUIPE is the gold standard of fully enclosed cleaning trolleys, captivating not only with its particularly high-grade design – its clever configuration concept also permits over one million individual settings. With its complete range from small to large, it professionally meets every technical and spatial challenge.

EVEN THE BEST LEAVES ROOM FOR IMPROVEMENT

One thing our customers have been able to depend upon for over 90 years: We at VERMOP listen to them very closely. We constantly question the status quo. And we consistently advance the development of our cleaning solutions. And that’s exactly what we have done with our Equipe cleaning trolley.

Not only have we “reinvented” its coupling system, we have placed the entire concept under the microscope – as a whole and down to the smallest detail. The result: The new Equipe is the most functional, economical, ergonomically-perfected, adaptable and visually-appealing Equipe ever.
HEALTHCARE

THE SYSTEM FOR CLEANING EXPERTS

You are familiar with the cleaning challenges in your area of expertise. Allow us to convince you during an individual consultation, of how Equipe scores in your customer segment. For example in healthcare, in premises cleaning or hospitality. With Equipe, your efficient and reliable cleaning turns into a home game.
IN THE FAST LANE TO NEW SUCCESSES

Allow yourself to be convinced of the benefits of the Equipe

Ergonomics
We have developed the Equipe on the basis of the latest ergonomic findings. It easily adapts to different user heights. The position and height of the containers can be set individually, all trolley functions and appliances can be reached comfortably and in a way that is easy on the back. Even when fully loaded, very little effort is needed to move it thanks to its smooth steering.

Hygiene
Even when very strict hygiene stipulations apply, system solutions from VERMOP are ideal. This makes the Equipe perfect for professional use in challenging cleaning environments. Its smooth surfaces and its closed bucket and castors minimise the risk of spreading germs. With the newly-developed foot pedal on the disposal unit, touch-free cleaning is very simple.

Space miracle
The Equipe is a real space miracle. Its carefully-thought-out concept results in a remarkably high loading capacity – with, at the same time, outstanding use of space. Fold-down elements and flexible arrangement of equipment and functions create a lot of additional extra space. At the same time, its uncomplicated manoeuvrability proves an invaluable benefit in tight, difficult areas of work.

Security
Nothing stands in the way of using the Equipe in high-security areas: The lockable toolbox, the chemical centre and the sturdy doors guarantee secure storage of critical content (e.g. cleaning chemicals). A uniform locking system easily prevents unauthorised access.

Efficiency
Thanks to the modular construction of the Equipe, cleaning professionals have everything on board to meet the requirements of their daily work in combination with its high loading capacity, time-consuming trips to the cleaning cupboard are reduced to a minimum. A detachable unit permits, for instance, quick waste disposal or low-effort commissioning of soiled textiles for collection. The Equipe proves its efficiency with its high-end modular system which allows individual elements to be assembled on a plug-and-play basis.
Fold-up disposal unit
With the Equipe, the choice is yours. With one move, the disposal unit can be folded up. This permits a simple reduction of up to 30% of the required floor space.

Detachable disposal unit
The specially developed VERMOP detachment system separates the disposal unit from the supply unit with a single click. Now, waste or textiles can be separately disposed of or commissioned for collection. The Equipe simply remains stationary while this is happening.

Foot pedal
The lid of the disposal unit can be opened without hand contact using a foot pedal and gently closes automatically. This makes it possible to remove collected waste without touching it, minimising the risk of cross-contamination and ensuring ergonomic work practices.

RIGHT OF WAY FOR INNOVATION
For the new Equipe we have questioned not only the bigger picture – but also each individual detail.
Uniform locking system

A cleverly designed, straightforward locking system ensures that all elements – from bucket to cleaning textiles to mop – lock together for maximum grip, even when used consistently. It's a safety, efficiency and hygiene in the cleaning process.

Chemical centre

Safe and hygienic, works processes are permitted by the scalable chemical centre, which permits any number of boxes and other storage for almost all needs. The closed storage box results in a top appearance.

Handle holder

A specially developed handle holder with screw fastening can be used around the trolley. It is suitable for handle diameters of 20 to 30 mm and ensures quick attachment, simple handling and ergonomic and efficient work practices.

Smooth surfaces

An appealing design, hygiene and quality. Its aluminium paneling gives the Equipe form stability, durability, outstanding cleaning properties, premium quality and a premium look, as well as an unusually long service life.

Height adjustable driving handle

With the push of a button, the driving handle can be positioned at five different heights. This means that the handle can be effectively and ergonomically adapted to every user height. Incidentally, also available in combination with handle holder.

Optimised wheels

Due to the high-quality, trolley wheels in 125mm standard size the Equipe practically moves by itself – even fully loaded. The quiet running wheels make it perfect for use in noise-sensitive environments, such as in areas with patients or foot traffic. Furthermore, because its wheels are closed and easy to clean, it meets the highest hygiene standards (no dirt particles, such as hair, get caught in the wheel).

Colour coding

A cleverly designed, straightforward colour separation system marks all the elements – from bucket to cleaning textiles to mop – to ensure even greater consistency of use, safety, efficiency and hygiene in the cleaning process.

Scandinavian design

Clean lines, robust construction and innovative storage solutions give the Equipe contemporary design, hygiene and a premium look.
INDIVIDUALISATION DOWN TO THE SMALLEST DETAIL

With its elegant design, the new Equipe is guaranteed to make an impression on site. Motivate your employees with a tool they will be proud to be seen with. And design the Equipe just as you want it – as a rolling advertisement, it transports your corporate design and your professional image to customers and visitors.

Individual design
Design the paneling elements of the Equipe to suit your own wishes: from company logo to colored areas or complete designs. The VERMOP design team is looking forward to getting creative, together with you.

All colored design elements of the Equipe can be freely combined to match your corporate design or the trolley’s area of use. This includes the bumpers and driving handle as well as the buckets and boxes. These five colours are available:

- Black
- Blue
- Red
- Green
- Yellow
Thank to its modular concept, the Equipe can be custom configured to meet a range of different requirements. Here we present a number of examples for various areas of use.

**THE STANDARD WE SET OURSELVES: YOUR REQUIREMENTS**

Equipe Healthcare, with paneling, fold up + Module Des
Equipe Industry, without paneling, detachable + Module Twister wringer
Equipe Healthcare, with paneling, fold up + Module Sprint

**THE PLUS FOR YOU**

Individual configuration advice from our sales staff on site
Pre-assembled delivery to the premises For a fast and professional start
Training for your staff when starting on the premises Perfect results from the very beginning

VERMOP
A STRONG PARTNER BY YOUR SIDE...

VERMOP is one of the international leading manufacturers of products, systems and solutions for professional premises cleaning. The family company with proud tradition is now managed by the third generation and can look back on over 90 years of experience. The VERMOP headquarters are in Gilching near Munich. All production is carried out in our plants in Wertheim near Frankfurt am Main.

Our corporate dedication to quality has been ISO 9001-certified for twenty years; our dedication to environmental issues has been ISO 14001-certified for eight years. Simply nearer to you. Our service team is available in person throughout Europe. Our external sales force will support you on site at any time with competent and customer-oriented advice. Like the product range itself, all spare parts are “made in Germany” and come with guaranteed availability for at least five years.

SUSTAINABILITY
Preserve valuable resources with Equipe

- **Lasting flexible use**
  Replacement of components for altered premises requirements or change of premises

- **Long service life**
  The use of high-quality materials such as fibreglass-reinforced plastics

- **Production in Germany**
  Certified and transparent

- **Availability of spare parts**
  Guaranteed available for at least five years

- **Recyclable**
  All elements of the trolley can be recycled after use
