SPRINT V
Floor cleaning
SPRINT • FLOOR CLEANING

The new Generation Sprint V flat mop holder guarantees dual time saving for daily use. Your cleaning staff can attach mops faster than ever before; thanks to the holder’s V shape, it slips smoothly into the pouches of the mop. A further benefit is that new staff do not have to be trained specially! The holder also contributes to greater square meter coverage in premises cleaning as it is particularly light and manoeuvrable and allows a speedy mopping process, even in heavily-furnished areas.

Furthermore, with the Sprint V holder, you are also investing into your staff’s back health. The holder is opened via a hand switch while the operator remains in an upright position and the mop is discarded hygienically without having to be touched. Bending down to lift up dirty mops is no longer necessary!

Of course you can also have complete confidence in the cleaning performance of the Sprint V. The optimised contact surface of the holder ensures even mopping and very good dirt removal.

Combine the Sprint V with the versatile and durable VERMOP Sprint flat mop and the Scandic telescopic handle for the right working height.
AT A GLANCE

Simple attachment
Easy insertion of the holder into the pouches of the mop thanks to the V shape

Ergonomic working
Hand-switch opening of the holder and mop discarding while standing upright

Hygienic
No touching of soiled mops when discarding

Spotless cleaning results
Optimum contact of the holder for very good dirt removal

Fast, labour-saving work
Extremely manoeuvrable and smooth-running holder

Areas of application
- General cleaning
- Disinfectant cleaning
- Wet cleaning
- High degree of soiling

Site
- Hospital / Nursing home
- School / Nursery
- Office / Administration
- Industry

Methods
- F1 flat wringer
- Vertical wringer VK 4
- Des tub
- Pre-Wash
- Dosing sieve
- Dry cleaning
- Spray method
- Pour method

VERMOP® INDIVIDUAL

Individual colour printing on mop, e.g. with your customer’s logo, can be combined with colour-contrasting edge binding.

We would be pleased to sew RFID tags for our MopLog Medi-Tex control system, or for your own RFID logistic system, into our covers.
Focus on ergonomics and healthy backs

Around 4,000 times a year, the average cleaning operative bends over to lift a soiled mop off the floor. At the same time, back pain is the most frequent reason for medically-certified sick leave. It causes 7% of all lost working days.* This is why, in developing cleaning equipment, VERMOP focuses closely on methods of use which are easy on the back. Optimise the working conditions of your staff with the Sprint V holder! It is opened via a finger switch while the user remains upright and the soiled mop is discarded without bending.

Very good cleaning performance

The contact surface of the holder is optimised to achieve even mopping results and effective dirt removal.

Dry pre-cleaning with cloth

To facilitate pre-cleaning in order to remove loose dirt, fleece cloths can be wrapped around the holder and clipped on.

Hygienic

Soiled mops can be discarded without being touched.
Comfortable attachment
The equal-sided holder allows for the mop to be attached simply and quickly.

Energy saving
Combined with the Scandic telescopic handle with rotating ball, the holder glides over the floor with ease and minimum exertion.

Manoeuvrable and fast
Thanks to the highly mobile joint and the low weight, the holder moves easily around all kinds of obstacles.
**Suitable for all cleaning methods**

The Sprint V holder can be combined with all cleaning methods. Ideal for cleaning with pre-treated mops and attachment directly from the transport box.
